RE: St. Jerome Catholic Church Addition

Michael:

LKV Architects would like to take this opportunity to thank and congratulate Starr Corporation for exceptional project management and first rate construction quality on the recently completed St. Jerome Catholic Church Addition.

It has been our experience in recent years that standards of service and workmanship within the construction industry have been on a steady decline. St. Jerome Catholic Church addition stands in marked contrast to other recently completed projects by our firm.

Your staff's professionalism, thoroughness, attention to detail, and unwavering insistence on quality workmanship has resulted in a caliber of construction that I have personally not seen on a commercial project in many years. Bob Beer is to be commended for careful sub-contractor selection and project management, and Wayne Archer for demanding, and getting, quality sub-contractor workmanship.

Although I have personally expressed my appreciation to Bob and Wayne for a job well done, and have likewise shared these sentiments with Father Wekerle, I wanted to make sure that you knew that the efforts of your company have not gone unnoticed.

Keep up the good work.

Respectfully,

Wayne Thowless, AIA, NCARB
LKV Architects
